

## **Project Design Phase**

### **Proposed Solution**

Date	01/11/2025
Team ID	NM2025TMID02331
Project Name	Lease management

### **Conclusion**

In conclusion, a Lease Management System provides an efficient, accurate, and centralized solution for handling all lease-related activities. By automating key processes—such as lease tracking, rent payment reminders, document management, and renewal notifications—the system reduces manual effort and eliminates errors commonly found in traditional methods. It improves communication between property owners, managers, and tenants while ensuring timely payments and smoother operations.

### **Solution Description**

The proposed Lease Management System provides a comprehensive and centralized platform to manage all aspects of property leasing. It streamlines operations by allowing users to digitally create, store, and track lease agreements, monitor rent payments, and manage tenant information in one place. Automated reminders notify tenants about upcoming due dates and lease expirations, reducing delays and improving payment accuracy.
